

what are the current design trends?

there are a lot of current trends going on in 2023, but there are 2 of them which outstood out for me: “**maximalism**” and “**a handmade touch**”. “**maximalism**” is defined by bold, explosive typography, radical color combinations and overwhelming visual elements, whereas “**a handmade touch**” is all about hand-drawn appeal.

maximalism

a handmade touch

how am i going to use these two trends?

well when it comes about “maximalism” i do not want to make usage of all its characteristics, but the radical color combination. The “a handmade touch” trend will serve for some of my illustrations and text.
